From the end of the village in Freiweidach we follow the sign in the direction of Staudacheralm. Once we arrive in Staudach we continue the hike through a beautiful beech forest and continue in the direction of Staudacheralm. We walk past the alpine pasture in the direction of Hochgern. The path takes us up a sweaty steep climb in bends to the Hochgernsattel and then to the left to the summit. From the summit we have a view of the Chiemsee and the entire Chiemgau. To return to the starting point we use a different route via the Hochgernhaus, then downhill via the Agersgschwendt Alm and we reach the hiking car park. We now head in the direction of Staudach-Egerndach and return to the starting point of our hike.
